

Kaiser Permanente Insurance Company (KPIC)

Point-of-Service (POS) Drug Formulary with Specialty Drug Tier

This Drug Formulary was updated: January 1, 2026

NOTE: This drug formulary is updated often and is subject to change. Upon revision, all previous versions of the drug formulary are no longer in effect.

This document contains information regarding the drugs that are covered when you participate in the California Nongrandfathered Point of Service (POS) for Large Groups Health Insurance Plan(s) with specialty drug tier issued by Kaiser Permanente Insurance Company (KPIC) and fill your prescription at a MedImpact network pharmacy. If you belong to our POS plan and you intend to fill your prescriptions at a Kaiser Permanente pharmacy, please visit **kp.org/formulary** and select the **California Commercial HMO Formulary** for information on the drugs that are on the formulary of your HMO Tier benefit.

Access to the most current version of the Formulary can be obtained by visiting **kp.org/kpic-ca-rx-pos-ngf**.

For help understanding your KPIC insurance plan benefits, including cost sharing for drugs under the prescription drug benefit and under the medical benefit, please call **1-800-788-0710 or 711 (TTY)** Monday through Friday, 7 a.m. to 7 p.m.

For help with this Formulary, including the processes for submitting an exception request and requesting prior authorization and step therapy exceptions, please call MedImpact 24 hours a day, 7 days a week, at **1-800-788-2949 or 711 (TTY)**.

For cost sharing information for the outpatient prescription drug benefits in your specific plan, please visit: **kp.org/kpic-ca-rx-pos-ngf**.

For help in your preferred language, please see the “Kaiser Permanente Insurance Company Notice of Language Assistance” in this document.

FORMULARY INFORMATION

Notice: The Formulary is updated with changes on a monthly basis. Updates will be effective on the first day of the month. During the policy year, the following types of changes may be made:

- Removal of a drug or dosage form of a drug from the Formulary;
- A change in tier placement of a drug that results in an increase or decrease in cost sharing; and
- Adding or changing utilization management procedures applicable to a drug.

How to Use This Document

This document is a list of the approved prescription medications covered under your Nongrandfathered POS Health Insurance Plan including both generic and brand name drugs. This document applies only to prescribed outpatient prescription drugs obtained through a retail pharmacy within the MedImpact network pharmacy network. This document does not apply to medications administered in the doctor's office or in the hospital which are covered under your medical benefit. For information on drugs covered under your medical benefit, please see the General Benefits section of your *Certificate of Insurance*.

The Formulary may be accessed using either the categorical list of drugs or the alphabetical index. The categorical list of drugs in this Formulary groups drugs into drug categories and class based on the First National Databank (FDB), a widely-accepted independent drug classification system.

A prescription drug may be located by looking up the therapeutic category and class to which the drug belongs or the brand or generic name of the drug in the alphabetical index. A drug is listed alphabetically by the brand and generic name in the therapeutic category and class to which it belongs. The generic name for a brand name drug is included after the brand name in parentheses and all lowercase italicized letters. If a generic equivalent for a brand name drug is both available and covered, the generic drug will be listed separately from the brand name drug in all lowercase italicized letters. If a generic drug is marketed under a proprietary, trademark protected brand name, the brand name will be listed after the generic name in parentheses and regular typeface with the first letter of each word capitalized. If a generic equivalent for a brand name drug is not available on the market or is not covered, the drug will not be separately listed by its generic name.

EXAMPLE of how drugs are listed on the Formulary:

Brand name drug. The brand name antibiotic drug "Moxatag" would be listed as follows:

Under the Prescription Drug Name Column, therapeutic category "ANTI-INFECTIVE AGENTS", drug class "AMINOPENICILLIAN ANTIBIOTIC – ANTIBIOTICS", the prescription brand name drug is listed in all capital letters, "MOXATAG" followed by the generic equivalent of the drug shown in parenthesis, all lower case italicized "(amoxicillin)".

ANTI-INFECTIVE AGENTS – DRUGS FOR INFECTIONS	
AMINOPENICILLIAN ANTIBIOTIC – ANTIBIOTICS	
MOXATAG ORAL TABLET, ER MULTIPHASE 24 HR 775 MG (<i>amoxicillin</i>)	3

Generic drug. The generic antibiotic drug "amoxicillin" would be listed as follows:

Under the therapeutic category "ANTI-INFECTIVE AGENTS", drug class "AMINOPENICILLIAN ANTIBIOTIC – ANTIBIOTICS", the prescription generic drug is listed in lower case italics "*amoxicillin*".

ANTI-INFECTIVE AGENTS – DRUGS FOR INFECTIONS	
AMINOPENICILLIAN ANTIBIOTIC – ANTIBIOTICS	
<i>amoxicillin oral capsule 250 mg, 500 mg</i>	1

Tier Benefit Design

The Formulary applies to a tier benefit design, where the insured shares the cost of prescription drug therapy based on the drug's tier and copay or coinsurance. In most instances, generically available drugs will be covered in a separate lower tier (lower copay), and branded drugs listed on the Formulary will be covered under a higher tier (higher copay). Specialty drugs will be covered under the highest tier (coinsurance with prescription maximum). Federal Affordable Care Act (ACA) preventative medications will be eligible for coverage without cost sharing (zero copay or zero coinsurance).

Under your POS Plan, you will pay a different copay or coinsurance for preferred generic or preferred brand drugs and non-preferred generic and brand drugs. Preferred drugs cost you less than non-preferred drugs. Please refer to the Tier Definition table below to see how to identify which drugs are preferred or non-preferred drugs.

If you request a brand-name drug when a generic drug is prescribed, you may be responsible for paying the brand-name copay plus the difference in cost between the generic drug and the brand-name drug. Please see your *Certificate of Insurance* for details.

For all drugs within the Drug Formulary table, the tier level is denoted throughout the document using the following symbols (*refer to table below*).

Tier Definition:

Symbol	Guideline	Description
T0	Tier 0	Preventive-care benefits required under the Affordable Care Act (ACA) at no cost
T1	Tier 1	Preferred Generic Drugs
T2	Tier 2	Preferred Brand Name Drugs
T3	Tier 3	Non-Preferred Generic and Brand Name Drugs
T4	Tier 4	Specialty Drugs
DME	Other pharmacy items	Other pharmacy items and certain DME, such as test strips and lancets, available at the pharmacy and through your medical benefit.

Maintaining and Updating the Formulary

The MedImpact Healthcare Systems Pharmacy and Therapeutics (P&T) and Formulary Committees provide physicians and pharmacists with a method to evaluate the safety, efficacy and competitive prices for commercially available drug products. The MedImpact P&T and Formulary Committees meet quarterly and more often as warranted to ensure clinical relevancy of the Formulary.

The Formulary is updated by the MedImpact P&T and Formulary Committees using a structured approach to the drug selection process to ensure continuing patient access to rational drug therapies.

The MedImpact P&T and Formulary Committees use the following criteria in the evaluation of drug selection for the Formulary:

- Drug safety profile
- Drug efficacy
- Comparison of relevant therapeutic benefits to current formulary drugs of similar use, and to minimize therapeutic duplication where possible
- Lower costs relative to comparable therapy

What medications are covered?

Your prescription drug benefit will generally cover prescribed generic, brand, and specialty drugs listed on the Formulary if the drug is medically necessary, the prescription is filled by a MedImpact network pharmacy provider, and other coverage rules are followed. Over-the-counter (OTC) medications are not generally covered, however, certain preventive OTC medications are covered when prescribed by a physician, such as aspirin, iron supplementation and smoking cessation drugs. Durable medical equipment, prescribed by a physician to treat diabetes or to assist with inhalation devices, is also covered.

The Formulary lists the pharmacy benefits covered under your outpatient prescription drug benefit and obtained from a MedImpact network retail pharmacy. This Formulary does not apply to drugs and devices that are obtained through the medical benefit portion of your coverage, for example, medications provided or administered in the doctor's office or in the hospital or, unless specifically stated otherwise, devices covered under the Durable Medical Equipment benefit that are obtained at the doctor's office or through a Durable Medical Equipment vendor.

Diabetes medication and equipment. Your outpatient prescription drug coverage includes the following prescription items for the management and treatment of diabetes:

- Insulin
- Needles and syringes for injecting insulin
- Prescriptive medications for the treatment of diabetes
- Glucagon

Other pharmacy items. Some Durable Medical Equipment that is covered through your medical benefit is also available at the pharmacy: disposable blood glucose and ketone urine test strips; blood glucose monitors; lancets and lancet puncture devices; pen delivery systems for the administration of insulin; visual aids excluding eyewear to assist in insulin dosing; and peak flow meters.

Contraceptives. Your outpatient prescription drug coverage includes all prescribed FDA-approved contraceptive drugs, including over the counter FDA-approved female contraceptive methods at no cost-share when prescribed by a licensed health care professional authorized to prescribe drugs. All such medications require a prescription from your doctor.

ACA Preventive drugs at no cost. All medications, even over-the-counter (OTC) drugs, included under the federal Patient Protection and Affordable Care ACT (ACA) as preventive medications are eligible for coverage with no cost-share if the insured has a prescription from his or her doctor. However, some medications are only covered at no cost for patients who meet the criteria listed in the Formulary.

Note: The presence of a prescription drug on the Formulary does not guarantee that you will be prescribed that prescription drug by your prescribing provider for a particular medical condition.

Note: The copayment or coinsurance for a covered outpatient prescription drug for an individual prescription shall not exceed \$250 for a 30-day supply after satisfaction of the deductible, if any.

Note: The cost share for covered prescribed orally administered anti-cancer drugs shall not exceed \$200 for a 30-day supply.

What drugs are not covered?

General Exclusions

- Over-the-counter (OTC) medications or their equivalents, except for those OTC medications included in this Formulary.
- Any drug products used for cosmetic purposes.
- Experimental drug products or any drug product used in an experimental manner. Refer to your *Certificate of Insurance* for additional information.
- Replacement of lost or stolen medication.
- Medications administered by a clinician unless otherwise specified in the Formulary listing.
- Foreign-sourced drugs or drugs not approved by the U.S. Food & Drug Administration, except in certain cases of drug shortage, when allowed under the individual's pharmacy benefit.
- Weight loss drugs
- Sexual dysfunction drugs

Non-formulary drugs

Non-formulary drugs are covered when medically necessary.

How do I request an exception for a drug that is not on the Formulary?

You can request an exception to obtain coverage of a drug that is not on the Formulary by calling MedImpact at **1-800-788-2949**. Upon receipt of your exception request, MedImpact will notify you within 72 hours for non-urgent requests and within 24 hours if urgent circumstances exist of the request approval or other outcome. (Urgent circumstances exist when an insured is suffering from a health condition that may seriously jeopardize the insured's life, health or ability to regain maximum function or when you are using a drug while undergoing a current course of treatment.) If a standard exception request is granted, coverage of the non-formulary drug will be granted for the duration of the prescription, including refills. If an exception based on urgent circumstances is granted, coverage of the non-formulary drug will be granted for the duration of the urgency.

Are there any restrictions on the drugs covered on the Formulary?

Yes, for certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols (*refer to table below*).

Note: Pursuant to Health and Safety Code section 1367.22, as then constituted and later amended, coverage for a prescription drug shall not be limited or excluded if the drug was previously approved for coverage for you under your plan for a medical condition and the prescribing provider continues to prescribe the drug for the medical condition, provided that the drug is appropriately prescribed and is considered safe and effective for treating the medical condition.

Guideline Symbol Table:

Symbol	Guidelines	Description
AGE	Age Edit	Coverage depends on patient age.
PA	Prior Authorization	Requires a prior authorization based on specific clinical criteria. <i>See “What is a Prior Authorization?” below for additional</i>
QL	Quantity Limit	Coverage is limited to specific quantities per prescription and/or time period. Prior authorization is required for quantities exceeding the restriction.
ST	Step Therapy	Coverage depends on previous use of another drug. Prior authorization may be required. <i>See “What is Step Therapy?” below for additional information.</i>

What is a Prior Authorization?

A prior authorization (“PA”) is a technique that is used to encourage safe and competitively priced medication use. Many drugs have multiple indications, so PAs are placed on drugs to make sure the drug is appropriate and safe for the insured.

How does the program work?

Drugs marked with a PA mean that your prescriber must first show that you have a medically necessary need for that particular drug. This means that to receive coverage your prescriber will need to work with MedImpact to receive pre-approval of the drug. Prior authorized drugs have specific clinical criteria that you must meet in order to obtain coverage. Refer to Requirements / Limits column in the Formulary for drugs that require a PA.

Upon receipt of your prior authorization request, MedImpact will notify the licensed prescribing provider within 72 hours for non-urgent requests and within 24 hours if exigent circumstances exist of the request approval or other outcome. If MedImpact fails to respond within 72 hours for non-urgent requests and within 24 hours if urgent circumstances exist from receipt of a request form from a licensed prescribing provider, the request shall be deemed to have been approved. If you are not satisfied with the outcome, you can request a waiver by calling MedImpact at **1-800-788-2949**.

What are Quantity Limits?

Coverage for certain drugs may be limited to specific quantities per prescription and/or time period. Prior authorization is required for quantities exceeding the quantity limit guideline.

What is Step Therapy?

Selected prescription drugs require step therapy. The step therapy program encourages safe and competitively priced medication use. Under this program, a “step” approach is required to receive coverage for certain high-cost medications. This means that to receive coverage you may need to first try a proven, lower cost medication before using a more costly treatment.

How does the program work? The step therapy program requires that you have a prescription history for a “first-line” medication before your benefit plan will cover a “second-line” medication. A first-line medication is recognized as safe and effective in treating a specific medical condition, as well as keeping costs down. A second-line medication is a less- preferred or sometimes more costly treatment option. Refer to Step Therapy Edits in the Index section at the end of the Formulary for a complete list of medications requiring step therapy and their criteria.

When possible, your doctor should prescribe a first-line medication appropriate for your condition. If your doctor determines that a first-line drug is not appropriate for you or is not effective for you, your prescription drug benefit will cover a second-line drug when certain conditions are met. Prior authorization may be required. Upon receipt of your request for a second-line drug, MedImpact will notify the licensed prescribing provider within 72 hours for non-urgent requests and within 24 hours if urgent circumstances exist of the request approval or other outcome. If you are not satisfied with the outcome, you can request a waiver by calling MedImpact at **1-800-788-2949**.

Note: If you have transitioned from a prior health insurance coverage to a new KPIC health insurance policy, any prescription drug that is currently being prescribed and considered safe and effective to treat a medical condition may not be subject to step therapy if, under your prior coverage:

- 1) The drug was not previously subject to step therapy; or
- 2) Step therapy was already obtained.

This does not apply if MedImpact’s P&T Committee and/or your provider determines that such drug is no longer safe or effective to treat your medical condition. Prior authorization may be required for the continued coverage of a prescription drug prescribed pursuant to step therapy imposed under your prior coverage, and the prescribing provider is not precluded from prescribing another drug covered by the new policy that is medically appropriate for your condition.

The Pharmacy Network

This drug Formulary only applies to prescribed drugs, medicines and supplies purchased from a MedImpact network retail pharmacy. To fill your covered prescriptions, please visit a MedImpact network pharmacy. When visiting a MedImpact network pharmacy, please give the pharmacist your KPIC ID card with the MedImpact logo. The network of MedImpact network pharmacies includes over 60,000 chain and independent pharmacies nationwide. To find a MedImpact network pharmacy near you, call **1-800-788-2949**.

What drugs are eligible to be mailed from the mail-order pharmacy?

There is no mail-order pharmacy coverage available with respect to this Formulary through MedImpact network pharmacies. Mail-order pharmacy coverage is provided under the HMO tier of the POS Plan through Kaiser Permanente mail-order pharmacy. Please see your *Evidence of Coverage* or visit **kp.org/formulary** for details of this benefit.

Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations you may be subject to. Specific benefit inclusions, exclusions, and out-of-pocket costs are not reflected in the Formulary.

The Formulary applies only to outpatient drugs provided to you and does not apply to medications used in an inpatient setting. For specific questions regarding your coverage, please call KPIC Customer Service at **1-800-788-0710**.

Definition of Terms

The following terms apply to your prescription drug coverage and the drug Formulary.

“Brand name drug” means a drug that is marketed under a proprietary, trademark-protected name. A brand name drug is listed in this Formulary in all CAPITAL letters.

“Coinsurance” means a percentage of the cost of a covered health care benefit that you pay after you have paid the deductible, if a deductible applies to the health care benefit.

“Copayment” means a fixed dollar amount that you pay for a covered health care benefit after you have paid the deductible, if a deductible applies to the health care benefit.

“Deductible” means the amount you pay for covered health care benefits that are subject to the deductible before your health insurer begins to pay. If your health insurance policy has a deductible, it may have either one deductible or separate deductibles for medical benefits and prescription drug benefits. After you pay your deductible, you usually pay only a copayment or coinsurance for covered health care benefits. Your insurance company pays the rest.

“Drug Tier” means a group of prescription drugs that correspond to a specified cost sharing tier in your health insurance policy. The drug tier in which a prescription drug is placed determines your portion of the cost for the drug.

“Exception request” means a request for coverage of a non-formulary drug. If you, your designee, or your prescribing health care provider submits a request for coverage of a non-formulary drug, your insurer must cover the non-formulary drug when it is medically necessary for you to take the drug.

“Exigent circumstances” means when you are suffering from a medical condition that may seriously jeopardize your life, health, or ability to regain maximum function, or when you are undergoing a current course of treatment using a non-formulary drug.

“Formulary” or “prescription drug list” means the list of drugs that is covered by your health insurance policy under the prescription drug benefit of the policy.

“Generic drug” means a drug that is the same as its brand name drug equivalent in dosage, strength, effect, how it is taken, quality, safety, and intended use. A generic drug is listed in this Formulary in italicized lowercase letters.

“Medically Necessary” means health care benefits needed to diagnose, treat, or prevent a medical condition or its symptoms and that meet accepted standards of medicine. Health insurance usually does not cover health care benefits that are not medically necessary. The fact that a Physician may prescribe, authorize, or direct a service does not of itself make it Medically Necessary or covered by the Group Policy.

“Non-formulary drug” means a prescription drug that is not listed on this Formulary.

“Out-of-pocket costs” means your expenses for health care benefits that aren’t reimbursed by your health insurance. Out-of-pocket costs include deductibles, copayments, and coinsurance for covered health care benefits, plus all costs for health care benefits that are not covered.

“Over-the-counter (OTC) drugs” are medicines sold directly to a consumer without requiring a prescription from a healthcare professional. For purposes of this Formulary, OTC drugs that are covered under your outpatient prescription drug benefit require a prescription from your doctor.

“Prescribing provider” means a health care provider who can write a prescription for a drug to diagnose, treat, or prevent a medical condition.

“Prescription” means an oral, written, or electronic order from a prescribing provider authorizing a prescription drug to be provided to a specific individual.

“Prescription drug” means a drug that by law requires a prescription.

“Prior Authorization” means a decision by your health insurer that a health care benefit is medically necessary for you. If a prescription drug is subject to prior authorization in this Formulary, your prescribing provider must request approval from your health insurer to cover the drug before you fill your prescription. Your health insurer must grant a prior authorization request when it is medically necessary for you to take the drug.

“Step therapy” means a specific sequence in which prescription drugs for a particular medical condition must be tried. If a drug is subject to step therapy in this Formulary, you may have to try one or more other drugs before your health insurance policy will cover that drug for your medical condition. If your prescribing provider submits a request for an exception to the step therapy requirement, your health insurer must grant the request when it is medically necessary for you to take the drug.

“Specialty drug” means high-cost prescription medications that are used to treat complex and chronic conditions, such as multiple sclerosis, rheumatoid arthritis, and hepatitis C. Specialty drugs often require special handling, administration, or monitoring.

Kaiser Foundation Health Plan, Inc. (KFHP) underwrites the HMO tier of the Kaiser Permanente POS Plan and Kaiser Permanente Insurance Company (KPIC), a subsidiary of KFHP, underwrites the participating and non-participating provider tiers of the Kaiser Permanente POS Plan.
