

KAISER PERMANENTE®
Northwest Medical Benefit Formulary
(List of Covered Drugs)

Please Read: This document contains information about the drugs we cover when they are administered to you in a Participating Medical Office.

What is the Kaiser Permanente Northwest Medical Benefit Formulary?

A formulary is a list of covered drugs chosen by a group of Kaiser Permanente physicians and pharmacists known as the Formulary and Therapeutics Committee. This committee meets regularly to evaluate and select the safest, most effective medications for our members.

Kaiser Permanente Formulary

The formulary list that begins on the next page provides information about some of the drugs covered by our plan when they are administered to you in a Participating Medical Office. Depending on your medical benefits, you may pay a cost share for the drug itself.

The first column of the chart lists the drug's generic name. The second column lists the brand name. Most administered medications and vaccines are only available as brand name drugs.

Contraceptive Drugs and Devices

Your provider may prescribe as medically necessary any FDA-approved contraceptive drug or device, including those on this formulary, which you will receive at no cost share.
