

**KAISER PERMANENTE®**  
**2025 Northwest Self-Funded Formulary**  
**(List of Covered Drugs)**

---

**Please Read:** This document contains information about the drugs we cover when you participate in a Kaiser Permanente Self-Funded plan.

---

**What is the Kaiser Permanente Northwest Self-Funded Formulary?**

A formulary is a list of covered drugs chosen by a group of Kaiser Permanente physicians and pharmacists known as the Formulary and Therapeutics Committee. This committee meets regularly to evaluate and select the safest, most effective medications for our members.

**What is a generic drug?**

Our plan covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

**What is a brand-name drug?**

Brand-name drugs are manufactured and sold by the pharmaceutical company that originally researched and developed the drug. When the patent on a brand-name drug expires, other pharmaceutical companies may manufacture and sell an FDA-approved generic version of the drug with the same active ingredient(s) at lower prices.

**What are specialty-tier drugs?**

Specialty-tier drugs are very high-cost drugs.

**Kaiser Permanente Formulary**

The formulary list that begins on page three provides coverage information about some of the drugs covered by our plan.

The first column of the chart lists the drug name. A drug is listed alphabetically by its brand and generic names in the therapeutic category and class to which it belongs.

The generic name of a brand-name drug is included after the brand name in parentheses and all bold and italicized lowercase letters.

If a generic equivalent for a brand-name drug is available, and both the brand-name and generic equivalents are covered, the generic drug will be listed separately from the brand-name drug in all bold and italicized lowercase letters.

If a generic drug is marketed under a proprietary, trademark protected brand name, the brand name is listed in all CAPITAL letters after the generic name in parentheses and regular typeface with the first letter of each word capitalized.

EXAMPLES	
Brand-name drug	CELONTIN CAPS 300 MG [ <i>methsuximide</i> ]
Generic drug	<i>allopurinol tabs 100 mg</i>
Generic drug marketed with a brand name	[Gentamicin Sulfate (ophth)] GENTAK OINT 0.3 %

The second column will indicate what tier the drug is in. Drugs on our formulary are categorized as Generic, Preferred Brand or Specialty.

The third column of the chart will indicate any requirements or limits for that drug.

DS = A drug that is limited to no more than a 30-day supply per dispense.

PA = A drug that requires specific medical criteria be met and requires approval by the plan prior to being dispensed for benefit.
