I. Introduction and Background

A. About Kaiser Permanente

Kaiser Permanente is an integrated health care delivery system comprised of Kaiser Foundation Hospitals, Kaiser Foundation Health Plan, and physicians in the Permanente Medical Groups. For more than 75 years, Kaiser Permanente has been committed to shaping the future of health and health care — and helping our members, patients, and communities experience more healthy years. We are recognized as one of America's leading health care providers and nonprofit health plans.

Kaiser Permanente is committed to helping shape the future of health care. Founded in 1945, Kaiser Permanente has a mission to provide high- quality, affordable health care services and to improve the health of our members and the communities we serve. We currently serve 12.4 million members in 8 states and the District of Columbia. Care for members and patients is focused on their total health and guided by their personal Permanente Medical Group physicians, specialists, and team of caregivers. Our expert and caring medical teams are empowered and supported by industry-leading technological advances and tools for health promotion, disease prevention, state-of-the-art care delivery, and world-class chronic disease management. Kaiser Permanente is dedicated to care innovations, clinical research, health education, and the support of community health.

B. About Kaiser Permanente Community Health

At Kaiser Permanente, we recognize that where we live and how we live has a big impact on our health and well-being. Our work is driven by our mission: to provide high-quality, affordable health care services and to improve the health of our members and our communities. It is also driven by our heritage of prevention and health promotion, and by our conviction that good health is a fundamental right.

As the nation's largest nonprofit, integrated health system, Kaiser Permanente is uniquely positioned to improve the health and wellbeing of the communities we serve. We believe that being healthy is not just a result of high-quality medical care. Through our resources, reach, and partnerships, we are addressing unmet social needs and community factors that impact health. Kaiser Permanente is accelerating efforts to broaden the scope of our care and services to address all factors that affect people's health. Having a safe place to live, enough money in the bank, access to healthy meals and meaningful social connections is essential to total health. Now is a time when our commitment to health and values compels us to do all we can to create more healthy years for everyone. We also share our financial resources, research, nurses and physicians, and our clinical practices and knowledge through a variety of grantmaking and investment efforts.

For information on the CHNA, refer to the [2022 Community Health Needs Assessments and Implementation Strategies](http://www.kp.org/chna) (<http://www.kp.org/chna>).

C. Purpose of the Report

Since 1996, Kaiser Foundation Hospitals (KFH) in Northern and Southern California (NCAL, SCAL) have annually submitted to the California Department of Health Care Access and Information (HCAI) a Consolidated Community Benefit Plan, commonly referred to as the SB 697 Report (for Senate Bill 697 which mandated its existence). This plan fulfills the annual year-end community benefit reporting regulations under the California Health and Safety Code, Section 127340 et seq. The report provides detailed information and financial data on the Community Benefit programs, services, and activities provided by all KFH hospitals in California.

II. Overview and Description of Community Benefit Programs Provided

A. California Kaiser Foundation Hospitals Community Benefit Financial Contribution

In California, KFH owns and operates 36 hospitals: 21 community hospitals in Northern California and 15 in Southern California, all accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). KFH hospitals are located in Anaheim, Antioch, Baldwin Park, Downey, Fontana, Fremont, Fresno, Irvine, Los Angeles, Manteca, Modesto, Moreno Valley, Oakland, Ontario, Panorama City, Redwood City, Richmond, Riverside, Roseville, Sacramento, San Diego, San Francisco, San Jose, San Leandro, San Marcos, San Rafael, Santa Clara, Santa Rosa, South Bay, South Sacramento, South San Francisco, Vacaville, Vallejo, Walnut Creek, West Los Angeles, and Woodland Hills.

In 2024, Kaiser Foundation Hospitals in Northern and Southern California Regions provided a total of **\$1,817,728,928** in Community Benefit for a diverse range of community projects, medical care services, research, and training for health and medical professionals. These programs and services are organized in alignment with SB697 regulations:

- Medical Care Services for Vulnerable Populations
- Other Benefits for Vulnerable Populations
- Benefits for the Broader Community
- Health, Research, Education and Training

A breakdown of financial contributions is provided in Table A. Note that 'non-quantifiable benefits' will be highlighted in the Year end Results section of KFH Community Benefit Plan, where applicable.

Table A

2024 Community Benefits Provided by Kaiser Foundation Hospitals in California (Endnotes in Appendix)

Category	Total Spend
Medical Care Services for Vulnerable Populations	
Medi-Cal shortfall ¹	\$713,469,866
Charity care: Medical Financial Assistance Program ²	\$775,417,176

Health research	\$40,597,825
Subtotal	\$218,820,921
TOTAL COMMUNITY BENEFITS PROVIDED	\$1,817,728,928

B. Medical Care Services for Vulnerable Populations

Medi-Cal

Kaiser Permanente provides coverage to Medi-Cal members in 32 counties in California through both direct contracts with the Department of Health Care Services (DHCS), and through delegated arrangements with other Medi-Cal managed care plans (MCPs). Kaiser Permanente also provides subsidized health care on a fee-for-service basis for Medi-Cal beneficiaries not enrolled as KFHP members. Reimbursement for some services is usually significantly below the cost of care and is considered subsidized care to non-member Medi-Cal fee-for-service patients.

Charitable Health Coverage

The Charitable Health Coverage program provides health care coverage to low-income individuals and families who do not have access to other public or private health coverage. CHC programs work by enrolling qualifying individuals in a Kaiser Permanente Individual and Family Health Plan. Through CHC, members' monthly premiums are subsidized, and members do not have to pay copays or out-of-pocket costs for most care at Kaiser Permanente facilities. Through CHC, members have a medical home that includes comprehensive coverage, preventive services and consistent access through the "front door" of the health delivery system.

Medical Financial Assistance

The Medical Financial Assistance program (MFA) improves health care access for people with limited incomes and resources and is fundamental to Kaiser Permanente's mission. Our MFA program helps low-income, uninsured, and underinsured patients receive access to care. The program provides temporary financial assistance or free care to patients who receive health care services from our providers, regardless of whether they have health coverage or are uninsured.

C. Other Benefits for Vulnerable Populations

Watts Counseling and Learning Center (SCAL)

Since 1967, the Watts Counseling and Learning Center (WCLC) has been a valuable community resource for low-income, inner-city families in South Central Los Angeles. WCLC provides mental health and counseling services, educational assistance to children with learning disabilities, and a state-licensed and nationally accredited preschool program. Kaiser Permanente Health Plan membership is not required to receive these services, and all services are offered in both English and Spanish. This program primarily serves the KFH-Downey, KFH-South Bay and KFH-West LA communities.

Educational Outreach Program (SCAL)

Since 1992, Educational Outreach Program (EOP) has been empowering children and their families through several year-round educational, counseling, and social programs. EOP helps individuals develop crucial life-skills to pursue higher education, live a healthier lifestyle through physical activity and proper nutrition, overcome mental obstacles by participating in counseling, and instill confidence to advocate for the community. EOP primarily serves the KFH-Baldwin Park community.

Youth Internship and Education Programs (NCAL and SCAL)

Youth workforce programs such as the Summer Youth Employment Programs, IN-ROADS or KP LAUNCH focus on providing underserved students with meaningful employment experiences in the health care field. Educational sessions and motivational workshops introduce them to the possibility of pursuing a career in health care while enhancing job skills and work performance. These programs serve as a pipeline for the organization and community-at-large, addressing workforce shortages and enhancing cultural competency within the health care workforce.

D. Benefits for the Broader Community

Community Health Education and Health Promotion Programs (NCAL and SCAL)

Health Education provides evidence-based clinically effective programs, printed materials, and training sessions to empower participants to build healthier lifestyles. This program incorporates tested models of behavior change, individual/group engagement and motivational interviewing as a language to elicit behavior change. Many of the programs and resources are offered in partnership with community-based organizations, and schools.

E. Health Research, Education, and Training Programs

Graduate Medical Education (GME)

The Graduate Medical Education (GME) program provides training and education for medical residents and interns in the interest of educating the next generation of physicians. Residents are offered the opportunity to serve a large, culturally diverse patient base in a setting with sophisticated technology and information systems, established clinical guidelines and an emphasis on preventive and primary care. The majority of medical residents are studying within the primary care medicine areas of family practice, internal medicine, ob/gyn, pediatrics, preventive medicine, and psychiatry.

Non-MD Provider Education and Training Programs

Kaiser Permanente provides a range of training and education programs for nurse practitioners, nurses, radiology and sonography technicians, physical therapists, post-graduate psychology and social work students, pharmacists, and other non-physician health professionals. This includes Northern California Region's Kaiser Permanente School of Allied Health Sciences, which offers 18-month training programs in sonography, nuclear medicine, and radiation therapy, and Southern California Region's Hippocrates Circle Program, which was designed to provide youth from underserved communities with an awareness of career opportunities as a physician.

Health Research

Kaiser Permanente's research efforts are core to the organization's mission to improve population health, and its commitment to continued learning. Kaiser Permanente researchers study critical health issues such as cancer, cardiovascular conditions, diabetes, behavioral and mental health, and health care delivery improvement. Kaiser Permanente's research is broadly focused on three themes: understanding health risks; addressing patients' needs and improving health outcomes; and informing policy

and practice to facilitate the use of evidence-based care. Kaiser Permanente is uniquely positioned to conduct research due to its rich, longitudinal, electronic clinical databases that capture virtually complete health care delivery, payment, decision-making and behavioral data across inpatient, outpatient, and emergency department settings.

III. Community Served

A. Kaiser Permanente's Definition of Community Served

Kaiser Permanente defines the community served by a hospital as those individuals residing within its hospital service area. A hospital service area includes all residents in a defined geographic area surrounding the hospital and does not exclude low-income or underserved populations.

B. Demographic Profile of Community Served

KFH-Antioch service area demographic profile

Total population:	337,118
American Indian/Alaska Native	0.4%
Asian	12.2%
Black	11.8%
Hispanic	36.7%
Multiracial	4.7%
Native Hawaiian/other Pacific Islander	0.6%
Other race/ethnicity	0.2%
White	33.4%
Under age 18	25.6%
Age 65 and over	12.2%

SOURCE: AMERICAN COMMUNITY SURVEY, 2015-2019

C. Map and Description of Community Served

KFH-Antioch service area

 Kaiser Permanente hospital  Kaiser Permanente medical offices

The KFH-Antioch service area includes the eastern portion of Contra Costa County, which includes the major cities of Antioch, Bay Point, Brentwood, Knightsen, Oakley, and Pittsburg.

IV. Description of Community Health Needs Addressed

The following are the health needs KFH-Antioch is addressing during the 2023-2025 Implementation Strategy period. For information about the process and criteria used to select these health needs and the health needs that were not selected (and the rationale), please review the [2022 CHNA Report and the 2023-2025 Implementation Strategy Report](http://www.kp.org/chna) (<http://www.kp.org/chna>).

A. Health Needs Addressed

1. **Income & employment:** Economic opportunities provide individuals with jobs, income, a sense of purpose, and opportunities to improve their economic circumstances over time. Residents in the Antioch service area experience a higher unemployment rate and more students eligible for free and reduced-price lunch than average across the state and nation. Disparities exist in the percent of students eligible for free and reduced-price lunches, with rates higher in ZIP codes that have higher Black and Hispanic populations. The high prevalence of children living in poverty disproportionately impacts Black and Hispanic populations. Access to jobs, rated through a measure called ‘job proximity,’ is worse than the state rate and is a challenge experienced across racial and ethnic groups. Key informants noted there are few job opportunities in the Antioch service area causing people to commute out of Contra Costa County for employment and the local jobs are typically low wage, with no opportunity for advancement.
2. **Mental & behavioral health:** Mental health affects all areas of life, including a person’s physical well-being, ability to work and perform well in school and to participate fully in family and community activities. Mental and behavioral health outcomes for residents of the Antioch service area present a critical and urgent need, exacerbated by the COVID-19 pandemic. Rates for severe indicators of mental and behavioral health, including suicide and opioid overdose death, are higher for the Antioch service area compared to the rest of Contra Costa County. Deaths of despair—a measure that combines death rates of suicide, alcohol-related disease, and drug overdose. Key informants noted the need for mental health services for issues like depression and anxiety were exacerbated by COVID-19, especially during the shelter-in-place order and for youth, seniors, and those in the LGBTQ community. Informants also noted a limited number of therapists in the Antioch service area and the surrounding areas and that it is especially hard to find bilingual/bicultural therapists.
3. **Access to care:** Access to comprehensive, quality health care services — including having insurance, local care options, and a usual source of care — is important for ensuring quality of life for everyone. Despite having more insured residents and more physicians and dentists compared with the state within Contra Costa County, which contains the Antioch service area, outcomes on indicators such as insurance rates for children and infant mortality for the Antioch service area show access to care is a

significant need. Neighborhoods in the northwest region of the Antioch service area, with higher rates of Black and Hispanic residents, experience the highest rates of uninsured children in the Antioch service area. Rates of infant mortality are higher for multiracial and Black residents in the Antioch service area compared with Contra Costa County. Key informants shared barriers to accessing care including few local clinics, the Contra Costa County hospital not nearby, no coordinated, efficient transportation, and health care providers not being representative of the community and not always serving community members in an inclusive manner.

B. Health Needs Not Addressed

The significant health need identified in the 2022 CHNA that KFH-Antioch does not plan to address is Housing; the reasons Housing was not selected include less feasibility to make an impact on this need, less ability for Kaiser Permanente to leverage expertise or assets to address this need, and this need is incorporated into other selected needs.

V. Year-End Results

A. Community Benefit Financial Resources

Total Community Benefit expenditures are reported as follows:

- Medical care services for vulnerable populations include unreimbursed inpatient costs for participation in Kaiser Permanente-subsidized and government-sponsored health care insurance programs.
- Since 2006, figures for subsidized products have been reported on a cost-basis (e.g., the difference of total revenues collected for services less direct and indirect expenses).
- Grant and donations are recorded in the general ledger in the appropriate amount and accounting period on an accrual, not cash basis. The amount reported reflects hospital-specific, unreimbursed expenditures. When hospital-specific expenditures are not available, dollars are allocated to each hospital based on the percentage of KFHP members.
- The unreimbursed portion of medical, nursing, and other health care professional education and training costs are included.

Resource allocations are reported as follows:

- Financial expenditures are reported in exact amounts, if available, by hospital service area.
- If exact financial expenditure amounts are not available by hospital service area, then regional expenses are allocated proportionally based on KFHP membership or other quantifiable data.

Health research	\$1,325,975
Subtotal	\$2,251,975
TOTAL COMMUNITY BENEFITS PROVIDED	\$47,720,034

B. Examples of Activities to Address Selected Health Needs

All Kaiser Foundation Hospitals planned for and drew on a broad array of resources and strategies to improve the health of our communities. Resources and strategies deployed to address the identified health needs of communities include grantmaking, in-kind resources, and collaborations with community-based organizations such as local health departments and other hospital systems. Kaiser Permanente also leverages internal programs such as Medicaid, charitable health coverage, medical financial assistance, health professional education, and research to address needs prioritized in communities. Grants to community-based organizations are a key part of the contributions Kaiser Permanente makes each year to address identified health needs, and we prioritize work intended to reduce health disparities and improve health equity. In addition to contributing financial resources, we leveraged assets from across Kaiser Permanente to help us achieve our mission to improve the health of communities. The complete 2022 IS report is available at <https://www.kp.org/chna>.

For each priority health need in the 2022 Implementation Strategy, examples of stories of impact are described below. Additionally, Kaiser Permanente NCAL provided significant contributions to the East Bay Community Foundation (EBCF) in the interest of funding effective long-term, strategic community benefit initiatives. These EBCF-managed funds are not included in the financial totals for 2024.

Access to care

KFH-Antioch ensures access to care by serving those most in need of health care through Medicaid, medical financial assistance, and charitable health coverage.

Care and coverage programs, KFH-Antioch

Year	Care & coverage details	Medicaid, CHIP, and other government-sponsored programs	Charitable Health Coverage	Medical Financial Assistance	Total
2024	Investment	\$22,962,847	\$0	\$20,613,694	\$43,576,541
2024	Individuals served	24,420	66	15,933	40,419

Despite having more insured residents and more physicians and dentists in Contra Costa County, which contains the Antioch service area, when compared to state outcomes on indicators such as insurance rates for children and infant mortality the Antioch service area shows access to care is a significant need. Neighborhoods in the northwest region of the Antioch service area, with a higher number of Black and Hispanic or Latino residents, experience the highest rates of uninsured children. Together, three programs — Richmond Community Foundation/United Latino Voices, Hijas Del Campo, and Brighter Beginnings — improved health care access for underserved populations in the Antioch service area and surrounding Contra Costa County. By offering outreach and education, eligibility assistance, and application support, enrollment in health care coverage increased, particularly for low-income individuals and families. They received support enrolling in programs such as Medi-Cal, Covered California, and the Kaiser Permanente Community Health Care Program (CHCP).

Income and employment

Residents in the Antioch service area experienced a higher unemployment rate, and the area had more students eligible for free and reduced-price lunches than both state and national benchmarks. Disparities existed in the percentage of students eligible for free and reduced-price lunches, with rates higher in ZIP codes that had higher Black and Latino or Hispanic populations. This need for quality food can be addressed by expanding the availability of nutritious foods in low-income communities. The Food Bank of Contra Costa and Solano provided community food distribution events in partnership with community-based organizations and school districts to support low-income households who faced higher rates of food insecurity and diet-related disease. These agencies were

expected to support 150,000 residents in the Antioch service area per month and help to ensure all people had consistent access to healthy, affordable food.

Mental and Behavioral Health

Mental and behavioral health outcomes for residents of the Antioch service area presented a critical and urgent need that was exacerbated by the COVID-19 pandemic. Rates for some of the most severe indicators of mental and behavioral health, including suicide and opioid overdose death, were higher for the Antioch service area compared to the rest of Contra Costa County. By taking a community-based approach focused on providing mental health education, peer support, and access to resources that address stigma and promote resilience, health and well-being will improve. Monument Impact provides these services for populations in the central and east Contra Costa County portion of the service area. Through their work, adults will participate in programs aimed to increase mental health awareness, reduce stigma, strengthen peer support, and improve mental health outcomes.

Appendix B

Endnotes

- ¹ Amount includes hospital-specific, unreimbursed expenditures for Medi-Cal Managed Care members and Medi-Cal Fee-for-Service beneficiaries on a cost basis.
- ² Amount includes unreimbursed care provided to patients who qualify for Medical Financial Assistance on a cost basis.
- ³ Figures reported in this section for grants and donations consist of charitable contributions to community clinics and other safety-net providers and support access to care.
- ⁴ Applicable to only SCAL - Watts Counseling and Learning Center's service expenses are divided among three hospitals: KFH-Downey, KFH-South Bay, and KFH-West Los Angeles. Educational Outreach Program service expenses are only applicable to KFH-Baldwin Park.
- ⁵ Figures reported in this section are expenses for youth internship and education programs for under-represented populations.
- ⁶ Figures reported in this section for grants and donations consist of charitable contributions to community-based organizations that address the nonmedical needs of vulnerable populations.
- ⁷ The amount reflects the costs of the community benefit department and related operational expenses.
- ⁸ Figures reported in this section for grants and donations are aimed at supporting the general well-being of the broader community.
- ⁹ Amount reflects the net expenditures for training and education for medical residents, interns, and fellows.
- ¹⁰ Amount reflects the net expenditures for health professional education and training programs.
- ¹¹ Figures reported in this section for grants and donations consist of charitable contributions made to external nonprofit organizations, colleges, and universities to support the training and education of students seeking to become health care professionals.
