I. Introduction and Background

A. About Kaiser Permanente

Kaiser Permanente is an integrated health care delivery system comprised of Kaiser Foundation Hospitals, Kaiser Foundation Health Plan, and physicians in the Permanente Medical Groups. For more than 75 years, Kaiser Permanente has been committed to shaping the future of health and health care — and helping our members, patients, and communities experience more healthy years. We are recognized as one of America’s leading health care providers and nonprofit health plans.

Kaiser Permanente is committed to helping shape the future of health care. Founded in 1945, Kaiser Permanente has a mission to provide high- quality, affordable health care services and to improve the health of our members and the communities we serve. We currently serve 12.4 million members in 8 states and the District of Columbia. Care for members and patients is focused on their total health and guided by their personal Permanente Medical Group physicians, specialists, and team of caregivers. Our expert and caring medical teams are empowered and supported by industry-leading technological advances and tools for health promotion, disease prevention, state-of-the-art care delivery, and world-class chronic disease management. Kaiser Permanente is dedicated to care innovations, clinical research, health education, and the support of community health.

B. About Kaiser Permanente Community Health

At Kaiser Permanente, we recognize that where we live and how we live has a big impact on our health and well-being. Our work is driven by our mission: to provide high-quality, affordable health care services and to improve the health of our members and our communities. It is also driven by our heritage of prevention and health promotion, and by our conviction that good health is a fundamental right.

As the nation’s largest nonprofit, integrated health system, Kaiser Permanente is uniquely positioned to improve the health and wellbeing of the communities we serve. We believe that being healthy is not just a result of high-quality medical care. Through our resources, reach, and partnerships, we are addressing unmet social needs and community factors that impact health. Kaiser Permanente is accelerating efforts to broaden the scope of our care and services to address all factors that affect people’s health. Having a safe place to live, enough money in the bank, access to healthy meals and meaningful social connections is essential to total health. Now is a time when our commitment to health and values compels us to do all we can to create more healthy years for everyone. We also share our financial resources, research, nurses and physicians, and our clinical practices and knowledge through a variety of grantmaking and investment efforts.

For information on the CHNA, refer to the [2022 Community Health Needs Assessments and Implementation Strategies](http://www.kp.org/chna) (<http://www.kp.org/chna>).

C. Purpose of the Report

Since 1996, Kaiser Foundation Hospitals (KFH) in Northern and Southern California (NCAL, SCAL) have annually submitted to the California Department of Health Care Access and Information (HCAI) a Consolidated Community Benefit Plan, commonly referred to as the SB 697 Report (for Senate Bill 697 which mandated its existence). This plan fulfills the annual year-end community benefit reporting regulations under the California Health and Safety Code, Section 127340 et seq. The report provides detailed information and financial data on the Community Benefit programs, services, and activities provided by all KFH hospitals in California.

II. Overview and Description of Community Benefit Programs Provided

A. California Kaiser Foundation Hospitals Community Benefit Financial Contribution

In California, KFH owns and operates 36 hospitals: 21 community hospitals in Northern California and 15 in Southern California, all accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). KFH hospitals are located in Anaheim, Antioch, Baldwin Park, Downey, Fontana, Fremont, Fresno, Irvine, Los Angeles, Manteca, Modesto, Moreno Valley, Oakland, Ontario, Panorama City, Redwood City, Richmond, Riverside, Roseville, Sacramento, San Diego, San Francisco, San Jose, San Leandro, San Marcos, San Rafael, Santa Clara, Santa Rosa, South Bay, South Sacramento, South San Francisco, Vacaville, Vallejo, Walnut Creek, West Los Angeles, and Woodland Hills.

In 2024, Kaiser Foundation Hospitals in Northern and Southern California Regions provided a total of **\$1,817,728,928** in Community Benefit for a diverse range of community projects, medical care services, research, and training for health and medical professionals. These programs and services are organized in alignment with SB697 regulations:

- Medical Care Services for Vulnerable Populations
- Other Benefits for Vulnerable Populations
- Benefits for the Broader Community
- Health, Research, Education and Training

A breakdown of financial contributions is provided in Table A. Note that 'non-quantifiable benefits' will be highlighted in the Year end Results section of KFH Community Benefit Plan, where applicable.

TOTAL COMMUNITY BENEFITS PROVIDED	\$1,817,728,928

B. Medical Care Services for Vulnerable Populations

Medi-Cal

Kaiser Permanente provides coverage to Medi-Cal members in 32 counties in California through both direct contracts with the Department of Health Care Services (DHCS), and through delegated arrangements with other Medi-Cal managed care plans (MCPs). Kaiser Permanente also provides subsidized health care on a fee-for-service basis for Medi-Cal beneficiaries not enrolled as KFHP members. Reimbursement for some services is usually significantly below the cost of care and is considered subsidized care to non-member Medi-Cal fee-for-service patients.

Charitable Health Coverage

The Charitable Health Coverage program provides health care coverage to low-income individuals and families who do not have access to other public or private health coverage. CHC programs work by enrolling qualifying individuals in a Kaiser Permanente Individual and Family Health Plan. Through CHC, members' monthly premiums are subsidized, and members do not have to pay copays or out-of-pocket costs for most care at Kaiser Permanente facilities. Through CHC, members have a medical home that includes comprehensive coverage, preventive services and consistent access through the "front door" of the health delivery system.

Medical Financial Assistance

The Medical Financial Assistance program (MFA) improves health care access for people with limited incomes and resources and is fundamental to Kaiser Permanente's mission. Our MFA program helps low-income, uninsured, and underinsured patients receive access to care. The program provides temporary financial assistance or free care to patients who receive health care services from our providers, regardless of whether they have health coverage or are uninsured.

C. Other Benefits for Vulnerable Populations

Watts Counseling and Learning Center (SCAL)

Since 1967, the Watts Counseling and Learning Center (WCLC) has been a valuable community resource for low-income, inner-city families in South Central Los Angeles. WCLC provides mental health and counseling services, educational assistance to children with learning disabilities, and a state-licensed and nationally accredited preschool program. Kaiser Permanente Health Plan membership is not required to receive these services, and all services are offered in both English and Spanish. This program primarily serves the KFH-Downey, KFH-South Bay and KFH-West LA communities.

Educational Outreach Program (SCAL)

Since 1992, Educational Outreach Program (EOP) has been empowering children and their families through several year-round educational, counseling, and social programs. EOP helps individuals develop crucial life-skills to pursue higher education, live a healthier lifestyle through physical activity and proper nutrition, overcome mental obstacles by participating in counseling, and instill confidence to advocate for the community. EOP primarily serves the KFH-Baldwin Park community.

Youth Internship and Education Programs (NCAL and SCAL)

Youth workforce programs such as the Summer Youth Employment Programs, IN-ROADS or KP LAUNCH focus on providing underserved students with meaningful employment experiences in the health care field. Educational sessions and motivational workshops introduce them to the possibility of pursuing a career in health care while enhancing job skills and work performance. These programs serve as a pipeline for the organization and community-at-large, addressing workforce shortages and enhancing cultural competency within the health care workforce.

D. Benefits for the Broader Community

Community Health Education and Health Promotion Programs (NCAL and SCAL)

Health Education provides evidence-based clinically effective programs, printed materials, and training sessions to empower participants to build healthier lifestyles. This program incorporates tested models of behavior change, individual/group engagement and motivational interviewing as a language to elicit behavior change. Many of the programs and resources are offered in partnership with community-based organizations, and schools.

E. Health Research, Education, and Training Programs

Graduate Medical Education (GME)

The Graduate Medical Education (GME) program provides training and education for medical residents and interns in the interest of educating the next generation of physicians. Residents are offered the opportunity to serve a large, culturally diverse patient base in a setting with sophisticated technology and information systems, established clinical guidelines and an emphasis on preventive and primary care. The majority of medical residents are studying within the primary care medicine areas of family practice, internal medicine, ob/gyn, pediatrics, preventive medicine, and psychiatry.

Non-MD Provider Education and Training Programs

Kaiser Permanente provides a range of training and education programs for nurse practitioners, nurses, radiology and sonography technicians, physical therapists, post-graduate psychology and social work students, pharmacists, and other non-physician health professionals. This includes Northern California Region's Kaiser Permanente School of Allied Health Sciences, which offers 18-month training programs in sonography, nuclear medicine, and radiation therapy, and Southern California Region's Hippocrates Circle Program, which was designed to provide youth from underserved communities with an awareness of career opportunities as a physician.

Health Research

Kaiser Permanente's research efforts are core to the organization's mission to improve population health, and its commitment to continued learning. Kaiser Permanente researchers study critical health issues such as cancer, cardiovascular conditions, diabetes, behavioral and mental health, and health care delivery improvement. Kaiser Permanente's research is broadly focused on three themes: understanding health risks; addressing patients' needs and improving health outcomes; and informing policy

and practice to facilitate the use of evidence-based care. Kaiser Permanente is uniquely positioned to conduct research due to its rich, longitudinal, electronic clinical databases that capture virtually complete health care delivery, payment, decision-making and behavioral data across inpatient, outpatient, and emergency department settings.

III. Community Served

A. Kaiser Permanente's Definition of Community Served

Kaiser Permanente defines the community served by a hospital as those individuals residing within its hospital service area. A hospital service area includes all residents in a defined geographic area surrounding the hospital and does not exclude low-income or underserved populations.

B. Demographic Profile of Community Served

[KFH-Sacramento service area demographic profile](#)

Total population:	937,139
American Indian/Alaska Native	0.5%
Asian	14.3%
Black	8.6%
Hispanic	25.4%
Multiracial	5.2%
Native Hawaiian/other Pacific Islander	0.9%
Other race/ethnicity	0.2%
White	44.9%
Under age 18	22.0%
Age 65 and over	13.9%

C. Map and Description of Community Served

KFH-Sacramento service area

 Kaiser Permanente hospital  Kaiser Permanente medical offices

The KFH-Sacramento service area comprises parts of Sacramento and Yolo counties. Cities in this area include Davis, Sacramento, Rancho Cordova, West Sacramento, and Woodland.

IV. Description of Community Health Needs Addressed

The following are the health needs KFH-Sacramento is addressing during the 2023-2025 Implementation Strategy period. For information about the process and criteria used to select these health needs and the health needs that were not selected (and the rationale), please review the [2022 CHNA Report and the 2023-2025 Implementation Strategy Report](http://www.kp.org/chna). (<http://www.kp.org/chna>).

A. Health Needs Addressed

1. **Housing:** Having a safe place to call home is essential for the health of individuals and families. American families' greatest single expenditure is housing, and for most homeowners, their most significant source of wealth. Housing costs have soared in recent years, with many families experiencing difficulty paying for housing. Black and Latinx/o/a renters are more likely to live in cost-burdened households and face housing instability. In the Sacramento service area, 18 percent spend more than 30 percent of their income on housing, compared to 17 percent nationally. An additional 20 percent of individuals pay more than 50 percent of their income on housing, compared to 14 percent nationwide. Additionally, there are disparities related to housing issues such as, while 64 percent of white residents in Sacramento County are homeowners, only 47 percent of Native American, 46 percent of Latinx/o/a, and 33 percent of Black residents are homeowners. Interviewed community leaders shared that many immigrant families earn wages that are too low to afford rent and have unstable job prospects that make property ownership unlikely, in addition to the COVID-19 pandemic exacerbating the rate of homelessness in the area. They also identified strategies to address housing needs such as coordination between business associations, local governments, housing authorities, managed care organizations, and continuum of care providers.
2. **Access to care:** Access to comprehensive, quality health care services — including having insurance, local care options, and a usual source of care — is important for ensuring quality of life for everyone. Insurance itself does not guarantee access to appropriate care, and many community members experience barriers related to language, transportation options, and differential treatment based on race, as well as access to fewer health care resources. In the Sacramento service area, 14 percent of adults reported delaying or having difficulty accessing health care that they felt they needed. Furthermore, access to regular care varies by population: 89 percent of white, 85 percent of Asian, 85 percent of Black/African American, and 80 percent of Latinx/o/a residents have a usual source of health care. Interviewed community leaders shared that the lack of adequate translation and interpretation services continue to be an issue for residents whose primary language is not English. They also identified strategies to address access to care issues such as adapting services to be trauma-informed and culturally responsive.
3. **Mental & behavioral health:** Mental health affects all areas of life, including a person's physical well-being, ability to work and perform well in school and to participate fully in family and community activities. Anxiety, depression, and suicide ideation are on the rise due to the COVID-19 pandemic, particularly among Black and Latinx/o/a Americans. Communities across the country are experiencing a critical lack of capacity to meet the increased demand for mental health services. In the Sacramento service area, the rates of suicide deaths are higher than the state average (12.5 compared to 10.5), and rates for deaths of despair are similarly performing worse than the state (38.7 compared to 34.3). Additionally, there are disparities related to mental and

behavioral health issues, such as disproportionate rates of LGBTQ+ students in Sacramento County (85 percent) considering attempting suicide. Interviewed community leaders shared that the mental/behavioral health of adults and seniors has also been impacted by the pandemic, particularly for parents who balance jobs with their child's distance learning, frontline workers who risk their own safety and health, and seniors who are stressed and isolated from their loved ones. They also identified strategies to address mental and behavioral health needs such as developing career pathways for students to enter the mental health field and help meet the increasing need, while also promoting an influx of practitioners who are a part of, and can relate to, communities most in need.

4. **Income & employment:** Economic opportunities provide individuals with jobs, income, a sense of purpose, and opportunities to improve their economic circumstances over time. People with steady employment are less likely to have an income below poverty level and more likely to be healthy. Those who do not have enough resources to meet daily needs such as safe housing and enough food to eat are more likely to experience health-harming stress and die at a younger age. In the Sacramento service area, the median household income of \$68,808 leaves many unable to afford a home or pay medical bills. Further, there are significant racial disparities in per capita income, with Black residents in the county earning \$15,000 less than white residents, and Latinx/o/a residents earning \$20,000 less. Interviewed community leaders consistently emphasized that the same communities of color that have been historically impacted by redlining and poor job prospects are further disadvantaged during the COVID-19 pandemic. They also identified strategies to address income and employment issues including better promotion and awareness of existing income supplement and food programs, since many sources of help are already available but underutilized.

B. Health Needs Not Addressed

The significant health needs identified in the 2022 CHNA that KFH-Sacramento does not plan to address are shown in the table below, along with the reasons for not addressing those needs.

Reason	Community safety	Climate & environment
Community does not prioritize this need over other issues		x
Less feasibility to make an impact on this need		x
Less ability for Kaiser Permanente to leverage expertise or assets to address this need	x	x
Less ability to leverage community assets to address this need	x	x
Aspects of this need will be addressed in strategies for other needs	x	

V. Year-End Results

A. Community Benefit Financial Resources

Total Community Benefit expenditures are reported as follows:

- Medical care services for vulnerable populations include unreimbursed inpatient costs for participation in Kaiser Permanente-subsidized and government-sponsored health care insurance programs.
- Since 2006, figures for subsidized products have been reported on a cost-basis (e.g., the difference of total revenues collected for services less direct and indirect expenses).
- Grant and donations are recorded in the general ledger in the appropriate amount and accounting period on an accrual, not cash basis. The amount reported reflects hospital-specific, unreimbursed expenditures. When hospital-specific expenditures are not available, dollars are allocated to each hospital based on the percentage of KFHP members.
- The unreimbursed portion of medical, nursing, and other health care professional education and training costs are included.

Resource allocations are reported as follows:

- Financial expenditures are reported in exact amounts, if available, by hospital service area.
- If exact financial expenditure amounts are not available by hospital service area, then regional expenses are allocated proportionally based on KFHP membership or other quantifiable data.

Table B**KFH-Sacramento Community Benefits Provided in 2024** (Endnotes in Appendix)

Category	Total Spend
Medical Care Services for Vulnerable Populations	
Medi-Cal shortfall ¹	\$77,466,327

Health research	\$2,533,981
Subtotal	\$10,395,066
TOTAL COMMUNITY BENEFITS PROVIDED	\$124,225,099

B. Examples of Activities to Address Selected Health Needs

All Kaiser Foundation Hospitals planned for and drew on a broad array of resources and strategies to improve the health of our communities. Resources and strategies deployed to address the identified health needs of communities include grantmaking, in-kind resources, and collaborations with community-based organizations such as local health departments and other hospital systems. Kaiser Permanente also leverages internal programs such as Medicaid, charitable health coverage, medical financial assistance, health professional education, and research to address needs prioritized in communities. Grants to community-based organizations are a key part of the contributions Kaiser Permanente makes each year to address identified health needs, and we prioritize work intended to reduce health disparities and improve health equity. In addition to contributing financial resources, we leveraged assets from across Kaiser Permanente to help us achieve our mission to improve the health of communities. The complete 2022 IS report is available at <https://www.kp.org/chna>.

For each priority health need in the 2022 Implementation Strategy, examples of stories of impact are described below. Additionally, Kaiser Permanente NCAL provided significant contributions to the East Bay Community Foundation (EBCF) in the interest of funding effective long-term, strategic community benefit initiatives. These EBCF-managed funds, however, are not included in the financial totals for 2024.

Access to care

KFH-Sacramento ensures access to care by serving those most in need of health care through Medicaid, medical financial assistance, and charitable health coverage.

Care and coverage programs, KFH-Sacramento

Year	Care & coverage details	Medicaid, CHIP, and other government-sponsored programs	Charitable Health Coverage	Medical Financial Assistance	Total
2024	Investment	\$77,466,327	\$0	\$33,688,561	\$111,154,888
2024	Individuals served	67,688	26	28,574	96,288

Overall, the Sacramento service area has lower rates of uninsurance than state average, but two ZIP codes, both with underserved populations, have the highest rates of uninsurance. Access to comprehensive, quality health care services – including insurance coverage, local care options, and a reliable source of care – is essential for ensuring a high quality of life for residents in the Sacramento service area. To enhance access and support successful enrollment in Medi-Cal and other coverage options for low-income individuals, such as the Kaiser Permanente Community Health Care Program, the Healthy Community Forum for the Greater Sacramento region (commonly known as Community HealthWorks) is expanding its outreach and assistance efforts. Key strategies include establishing additional access points through trusted entities and community-based organizations (CBOs), hosting pop-up outreach and education events to raise awareness, generating referral leads, and facilitating new enrollments and renewals. Additionally, the initiative strengthened follow-up and engagement with existing clients and leveraged interactions to identify new opportunities for enrollment and renewal. Through these efforts, the initiative was expected to screen 1,000 individuals and families for services via outreach events, phone calls, or in-person assistance. Community HealthWorks supported both new enrollments and coverage renewals, along with health coverage education and guidance on available benefits. As needed, assistance was also offered in scheduling primary care and dental appointments, ensuring individuals could fully utilize their coverage and access essential health services.

Housing

In the Sacramento service area, housing costs have skyrocketed in recent years, making it increasingly difficult for families to afford stable housing. As part of a medical-legal partnership to address these challenges, Legal Services of Northern California provides free legal services to low-income and housing-insecure individuals and families, working to prevent evictions and keep clients housed in the Greater Sacramento area. Key activities include evaluating cases to determine the appropriate level of legal representation (from counsel and advice to full court representation), screening and referring cases for emergency housing assistance when settlements allowed clients to remain housed and avoid homelessness. Grant support for this work included a

flexible housing funding pool to help negotiate settlement agreements and biweekly training sessions for care coordinators to enhance case management and streamline patient referrals when mental or physical challenges impacted housing stability. With the goal of assisting 225 individuals this work expanded access to legal services for housing stabilization, prevented evictions, and strengthened housing security for the Sacramento service area's most vulnerable populations.

Income & Employment

In the Sacramento service area, the median household income of approximately \$69,000 leaves many residents struggling to afford housing and medical expenses. To help expand the local health care workforce, the Los Rios Community College District grant supports students studying to be in allied health professions (e.g., technicians, therapists, and technologists) by accelerating their certification and licensure completion. The Los Rios Promise to Career Allied Health Finish Line Project will support approximately 225 students in the Sacramento region as they prepare to launch careers in allied health fields. Scholarships of \$125 and \$250 will help cover state testing and licensing fees, eliminating the final financial barrier to employment. By removing this obstacle, the program empowered students to secure well-paying jobs, support their families, and help alleviate ongoing health care workforce shortages in the area.

Mental and Behavioral Health

Interviewed community leaders noted the long-term mental health impacts of trauma and specific mental health challenges of young people who experience lasting effects of the COVID-19 pandemic including increased reports of suicide attempts, sex trafficking, domestic violence and child abuse. To address these challenges, Yolo Crisis Nursery (YCN) and Sacramento Crisis Nursery (SCN), operated by Sacramento Children's Home, provided critical support to children and families in crisis, particularly those experiencing or at risk of violence – whether domestic, intimate partner, or perpetrated by a parent, caretaker, or family member. The nurseries also served children facing toxic stress due to Adverse Childhood Experiences (ACEs) or adverse living environments. YCN offers comprehensive case management, assisting adult clients in accessing essential resources, attending medical and court appointments, and enrolling in stabilization programs provided by the Crisis Nursery. SCN developed individualized crisis resolution plans for each family, facilitated advocacy efforts to reduce stress, ensured child safety, and met basic needs. Through these services, 3,300 individuals were expected to be served resulting in lower levels of toxic stress upon completing the nursery's programs compared to when they first sought assistance.

Appendix B

Endnotes

- ¹ Amount includes hospital-specific, unreimbursed expenditures for Medi-Cal Managed Care members and Medi-Cal Fee-for-Service beneficiaries on a cost basis.
- ² Amount includes unreimbursed care provided to patients who qualify for Medical Financial Assistance on a cost basis.
- ³ Figures reported in this section for grants and donations consist of charitable contributions to community clinics and other safety-net providers and support access to care.
- ⁴ Applicable to only SCAL - Watts Counseling and Learning Center's service expenses are divided among three hospitals: KFH-Downey, KFH-South Bay, and KFH-West Los Angeles. Educational Outreach Program service expenses are only applicable to KFH-Baldwin Park.
- ⁵ Figures reported in this section are expenses for youth internship and education programs for under-represented populations.
- ⁶ Figures reported in this section for grants and donations consist of charitable contributions to community-based organizations that address the nonmedical needs of vulnerable populations.
- ⁷ The amount reflects the costs of the community benefit department and related operational expenses.
- ⁸ Figures reported in this section for grants and donations are aimed at supporting the general well-being of the broader community.
- ⁹ Amount reflects the net expenditures for training and education for medical residents, interns, and fellows.
- ¹⁰ Amount reflects the net expenditures for health professional education and training programs.
- ¹¹ Figures reported in this section for grants and donations consist of charitable contributions made to external nonprofit organizations, colleges, and universities to support the training and education of students seeking to become health care professionals.
