

MEASURING CARE QUALITY IN OUR HOSPITALS

Kaiser Permanente Plan Hospital, Georgia Region Piedmont Hospital

May 2017

**Re: Kaiser Permanente Plan Hospital, Georgia Region
Piedmont Hospital, Inc.**

1968 Peachtree Road, NW
Atlanta, GA 30309-1285

At Kaiser Permanente, we participate in a number of independent reports on quality of care so our members and the public have reliable information to understand the quality of care we deliver, as well as a way to compare our performance to that of other health care organizations. Results from these reports are summarized below.

From: DNV Healthcare's National Integrated Accreditation of Healthcare Organizations (NIAHO) ®

http://dnvglhealthcare.com/hospitals?search_type=and&q=piedmont+hospital&c=19219&c=19178&prSubmit=Search

DNV Healthcare, granted deeming authority from the U.S. Centers for Medicare and Medicaid Services (CMS), provides a new approach to accreditation – focusing on quality, innovation, and continual improvement.

DNV's NIAHO program – National Integrated Accreditation of Healthcare Organizations – is based on collaboration and requires an annual survey and the organization's continual compliance with the DNV accreditation process. This emblem is displayed by an accredited hospital to let the community know that it is setting a new standard of quality-driven accreditation.

Piedmont Hospital was last accredited on July 7, 2014.

For Piedmont Hospital's current results on quality of care measures including Acute Myocardial Infarction, Heart Failure, Community Acquired Pneumonia, and the Surgical Care Improvement Process of Care Measures (SCIP), please see the CMS' *Hospital Compare* website (link on next page).

MEASURING SERVICE QUALITY IN OUR HOSPITALS

Kaiser Permanente Plan Hospital, Georgia Region

Piedmont Hospital

From: Consumer Assessment of Healthcare Providers and Systems Hospital Survey (Hospital CAHPS®) as reported by the Centers for Medicare & Medicaid Services (CMS)

The CAHPS Hospital Survey (HCAHPS) is the first national publicly reported standardized survey and data collection methodology for measuring all patients' perspectives of their hospital care. CMS posts quarterly updates on HHS' website. Collection and reporting of data are voluntary.

The results below are from patients discharged between **July 2015 and June 2016**. Scores reflect the percentage of patients who answered **"always"** (not "usually", "sometimes", or "never") to six composites and two individual "environment" questions and **"yes"** to the seventh "discharge information" composite. The composites and questions are described on the following page. Benchmark comparison numbers are determined by CMS and are based on all hospitals participating in Georgia.

*Data from the *Hospital Compare* website. An overview and details can be found at: <http://www.hospitalcompare.hhs.gov>, or through a link on <http://www.medicare.gov>.

Scores on the “overall rating” question below are based on a 0-10 scale, worst to best, and represent answers of **9 and 10**. Scores on the “recommend to friend” question are based on a 1-4 scale, ranging from “definitely no” to “definitely yes,” and reflect answers of **“definitely yes.”** Again, benchmark comparison numbers are determined by CMS and are based on all hospitals participating in Georgia.

HCAHPS Summary Star Rating: * * *. HCAHPS summary star ratings provide a snapshot of the 11 measures of patient experience of care in a single, comprehensive metric.

Descriptions of Questions

The seven composites are composed of the following questions:

- **Nurse Communication** results are a composite of three questions asking how often nurses treated you with courtesy and respect, carefully listened to you, and explained things in a way you could understand.
- **MD Communication** results are a composite of three questions asking how often doctors treated you with courtesy and respect, carefully listened to you, and explained things in a way you could understand.
- **Staff Responsiveness** results are a composite of two questions asking how often you got help as soon as you needed it from nurses or other hospital staff in getting to the bathroom or using a bedpan and after pressing the call button.
- **Pain Management** results are a composite of two questions asking how often your pain was well controlled and if the staff did everything they could help with your pain.
- **Medicines Explained** results are a composite of two questions asking how often staff told you what a new medicine was for before giving it to you and how often the staff described possible side effects in a way you could understand.
- **Discharge Information** results are a composite of two questions asking if doctors, nurses, or other hospital staff talked with you about whether you would have the help you needed when you left the hospital.
- **Care Transition** results are a composite of three questions asking about your understanding of your after-care for when you leave the hospital.

Two individual questions on hospital environment:

- How often were your room and bathroom kept **clean**?
- How often was the area around your room **quiet** at night?

And two questions relating to overall evaluation:

- How do you rate the hospital **overall**?
- Would you **recommend** the hospital to a friend?
