

What I Love (2025) Brenda G., Member

The reason I and my family trust Kaiser Permanente with my health care is because even from my first diagnosis with breast cancer, it seemed like they just teamed up and went out of their way to make sure that I was getting the best treatment. What's the best possible action plan that we can give for Brenda Grissom? What is our best possible way that we can treat this and fight this disease? I can't express how much it means to me that I feel like all the doctors work together. They're all part of my care. I mean something to them and I feel like they've teamed up to do that, to make sure that I got the best care. And here I am 40 years later, cancer free. My name is Brenda Grissom, and I have been a Kaiser Permanente member for 48 years. Kaiser Permanente.
