

Cardiac Care

Feel like I did when I was 40 now.

What Frank was able to get was a minimally invasive procedure that we do through the leg and deployed a valve to replace the heart valve without cutting his chest open.

These outcomes are being made more public. And as they're being made more public, it doesn't surprise me at all that we're starting to get very high rankings, the highest rankings possible in many different domains.

Can't go all the way back to 20, but we can go 35 or 40.
