Kaiser Permanente Hawaii Marketplace Drug Formulary

Effective June 1, 2020

Kaiser Permanente Hawaii uses a drug formulary to ensure that the most appropriate and effective prescription drugs are available to you. The formulary is a list of drugs that have been approved by our Pharmacy and Therapeutics (P&T) Committee. Committee members include pharmacists, physicians, nurses, and other allied health care professionals.

Our drug formulary allows us to select drugs that are safe, effective, and a good value for you. We review our formulary regularly so that we can add new drugs and remove drugs that can be replaced by newer, more effective drugs. The formulary also helps us restrict drugs that can be toxic or otherwise dangerous if misused.

Our drug formulary is considered a closed formulary, which means that drugs on the list are usually covered under the prescription drug benefit, if you have one. However, drugs on our formulary may not be automatically covered under your prescription benefit because these benefits vary depending on your plan. Please check with your Kaiser Permanente pharmacist when you have questions about whether a drug is on our formulary or if there are any restrictions or limitations to obtaining a drug.

For information on our Medicare Part D formulary, please refer to our Senior Advantage section on the kp.org website.

NON-FORMULARY DRUGS

Non-formulary drugs are those that are not included on our drug formulary. These include new drugs that haven't been reviewed yet; drugs that our clinicians and pharmacists have decided to leave off the formulary, or a different strength or dosage of a formulary drug that we don't stock in our Kaiser Permanente pharmacies.

Even though non-formulary drugs are generally not covered under our prescription drug benefit options, your Kaiser Permanente doctor can request a non-formulary drug for you when formulary alternatives have failed and the non-formulary drug is medically necessary, provided the drug is not excluded under the prescription drug benefit.

If the request is accepted, you may purchase your prescription at your usual supplemental charge. Non-formulary drugs are not usually stocked in our pharmacies, so it may take a little longer to have your prescription filled for one of these drugs.

SHARE INFORMATION WITH YOUR DOCTOR

If you're taking multiple drugs–including prescription or over-the-counter drugs, herbs, natural supplements, and even nutraceuticals (foods or parts of a food that provide health benefits)–be sure to share this information with your physician or pharmacist. Because some drugs interact with others, we want to be sure that you get the maximum benefit and the least risk from everything you consume. Bring all your drugs to each physician appointment or call one of our pharmacies and make an appointment with a pharmacist to review everything you're taking.
